Meet the Hosts

Nereland Agro Ethno Park is the result of the vision and dedication of the Mijoč family.

Ivica Mijoč, the project's founder and a traffic engineer by profession, together with his wife Anita and son Josip, created a unique environment interwoven with nature, tradition, and authentic Neretva culture.

The idea was born from a desire to escape city life and create a place of peace – and to share that magic with others. Ivica oversaw the design and construction, while Anita created the park's landscape, carefully selecting native plants to create harmony with the natural environment.

Today, all family members are involved in the daily running of the park, supported by a wider team of waiters, cooks, and staff, welcoming guests year-round.
